

Inspire and... be inspired

The **Regions 202020 Inspiration Guide** aims to provide all the information you need to become a Sustainable Energy Region

- The guide helps you to decide where to start and what to do next in your journey to become a Sustainable Energy Region
- Ensure long term benefits for your Region, its stakeholders and citizens
- Protect the environment by using local renewable energy sources and minimising energy use
- Boost the economy and creating new jobs
- Identify where you can get further information, support and funding

Our aim is to enable your region to become a frontrunner in achieving such benefits by inspiring you to replicate actions in your region. This is based on experiences from the 12 ENNEREG Pioneer Sustainable Energy Regions, encompassing regional Sustainable Action Plans (SEAPs) and linked sustainable energy measures. By the time you reach the end of the Inspiration Guide you will know how to create your region's Sustainable Energy Action Plan (SEAP) not only as a collection of measures, but also as a strategy that makes these measures coherent with European, National and Local regulations that you need to be familiar with. You will also have been introduced to numerous concrete examples of Sustainable Energy Projects that you could replicate and could help you

Achieve Your Vision for Your Region!

Stay informed

ENNEREG project reports including a summary of the Inspiration Guide highlighting key points will be published online by the end of the project in May 2013.

Join the Regions 202020 Network at: www.regions202020.eu/register-en and stay informed on the progress of the ENNEREG Pioneer Regions and availability of the Inspiration Guide and associated reports

See overleaf for more info

Further sources of inspiration

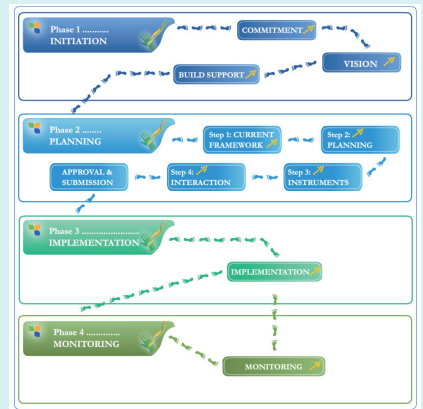

Along with **Good Practice case studies** and **Sustainable Energy Action Plans** from the ENNEREG Pioneer Regions, the Inspiration guide is supported by a number of **Reports sharing experience gained** during the ENNEREG project.

Providing Inspiration - Step by Step

The Regions 2020 Inspiration Guide takes a step-by-step approach and provides background information to enable you to develop sustainability in your region.

- Introductory sections on the ENNEREG Project, European Perspective, What is Sustainability?
- Regional SEAP Process – Step by Step

- **Examples that can act as models that provide further inspiration to implement Sustainable Energy Projects (SEPs):**
 - Sustainable Energy Action Plans (SEAPs)
 - SEAPs from ENNEREG Pioneer Regions
 - Other Regional, Local and Nation SEAPs
- **Experiences from the ENNEREG Pioneer Regions**
 - Setting the Scene including point of departure, vision and goals, mobilising stakeholders
 - Putting a regional SEAP into place
 - SEAP and SEP Implementation
 - Reflection and future prospects including the benefits of ENNEREG intervention, follow-up prospects, key lessons learned of relevance to other regions
- **Replication in other Regions**
 - Lessons learnt from support activities in the ENNEREG Twin Regions
 - Recommendations for replication
- **100s of Good Practice Examples within the eight ENNEREG Sustainable Energy Themes**
 - Sustainable Energy Projects from the ENNEREG Pioneer and Twin Regions
 - Other Good Practice Publications and Collections
- **Information on Finance and Funding**
- **Database of Tools, Methodologies, Reports and other Resources**
