

### How Regions 202020 learns, shares and inspires

## 10 Reasons to join Regions 202020:

- 1 Find out how your Region and its Communities can help Europe meet its 20-20-20 targets
- 2 Link with local stakeholders throughout the EU
- 3 Exchange experiences and share knowledge and resources
- 4 Benefit from interaction with the Covenant of Mayors and ManagEnergy Local Energy Actors
- 5 Replicate existing good practice
- 6 Learn from and be guided by Pioneer Sustainable Energy Regions
- 7 Give others the benefit of your experience
- 8 Develop and enhance your Sustainable Energy Action Plan (SEAP)
- 9 Initiate Sustainable Energy Projects (SEPs) within focussed energy themes

## 10 Inspire and be inspired!

Find out more inside and on the Regions 202020 website

## ENNEREG Regions paving the way for a Sustainable Energy Europe

is a European project supported by the Intelligent Energy - Europe programme. ENNEREG aims to establish and inspire a network of regions throughout Europe – **Regions 202020** - to produce regional Sustainable Energy Action Plans (SEAPs) and implement Sustainable Energy Projects (SEPs).

In May 2010, **12 ENNEREG “Pioneers”** started on their journey to become Sustainable Energy Regions.

These ENNEREG Regions, which range from islands in Greece and Portugal to the whole of Wales, will undertake SEAP and SEP development and implementation, exchanging experiences and lessons learned in the process.

The activities in the ENNEREG Regions will focus on eight key Sustainable Energy themes:

Energy efficient buildings  
Energy efficiency in industry  
Energy efficient products  
Sustainable transport  
Renewable energy  
Energy services  
Intelligent energy education  
Energy monitoring

### 12 Pioneer ENNEREG Regions

### Exchange Experience and Be Inspired!

The lessons learnt by the 12 ENNEREG Pioneer Regions will be combined with knowledge from other regions already developing and implementing SEAPs and SEPs. These Pioneers will exchange experience and inspire, guide and support replication throughout Europe via the Regions 202020 Network.

### Four key stages in the journey to a Sustainable Energy Europe

1

#### Pioneer Regions leading the way

The 12 ENNEREG Pioneers share their experiences as they progress through the process...

... providing step-by-step information on how regions develop and implement their SEAPs and SEPs ...

... supported by case studies and lessons learnt from Pioneer Sustainable Energy Regions throughout Europe

2

#### Inspiring Replication in Regions throughout Europe

ENNEREG Pioneers work hand-in-hand offering ...

... one-to-one guidance to 12 Twin Regions, as well as ...

... workshops, inspiration and guidance for other regions so that ...

... you can replicate Sustainable Energy good practice in your region

3

#### Exchanging experiences via the EU Regions 202020 Network [www.regions202020.eu](http://www.regions202020.eu)

Become a network member and join Regions from throughout Europe so you can:

- Exchange Experience and Lessons Learnt
- Be inspired and guided by an online Interactive Inspiration Guide
- Access a Knowledge Base of Good Practice, Tools, Videos, etc

4

#### Interacting with other EU Local and Regional Energy Actions

News from Intelligent Energy – Europe (IEE) Sustainable Energy Communities (SEC) projects offering:

- Encouragement and support for regions and communities at the local level
- Guidance on joining the Covenant of Mayors ([www.eumayors.eu](http://www.eumayors.eu))
- Direct Support for 100+ communities at the local level
- Links with ManagEnergy ([www.managenergy.net](http://www.managenergy.net)) events and services
