

**Inspiration Guide for
Regional Decision-makers**

Evaluation of ENNEREG Communication and Dissemination Activities

Summary Report

www.regions202020.eu

ENNEREG - Regions paving the way for a Sustainable Energy Europe is a European Project supported by the **Intelligent Energy - Europe programme**. The project started on 1 May 2010 and runs until 30 April 2013.

The aim of the **ENNEREG project** has been to establish and inspire EU Regions to take up the challenges of fulfilling the EU 20-20-20 climate and energy targets of at least 20% reduction in greenhouse gas emissions, 20% increase in energy efficiency and 20% of energy from renewables by 2020 (ec.europa.eu/climateaction/).

As part of the project **12 Pioneer ENNEREG Regions** have been producing regional **Sustainable Energy Action Plans (SEAPs)** and initiating **Sustainable Energy Projects (SEPs)**. The ENNEREG Pioneer Regions have been sharing their experience directly with 14 ENNEREG Twin Regions and ENNEREG has also been actively promoting replication in Sustainable Regions throughout Europe.

To promote and support these activities, the **ENNEREG Regions 2020** website (www.regions2020.eu) acts as a platform providing inspiration and encouraging networking and replication enabling regions and their local communities to exchange experiences and be inspired on their journey to develop and implement SEAPs and SEPs.

The ENNEREG Project has produced a number of reports based on input from the **12 Pioneer ENNEREG Regions** and Project Partners providing supporting material for the ENNEREG Inspiration Guide for regional decision-makers.

The **Inspiration Guide**, along with supporting documents including **Good Practice Case Studies**, **Regional SEAPs** and many other resources, can be found on the Regions 2020 website at: www.regions2020.eu/inspiration

Publication Date: 30 April 2013

Issue: 2 (D6.3 Final)

Prepared by: Katy Hall, CPL Scientific Publishing Services Ltd, UK

ENNEREG - Regions paving the way for a Sustainable Energy Europe is supported by the **Intelligent Energy - Europe (IEE) programme** under *Contract No: IEE/09/250.661/S12.558228*. The sole responsibility for the content of this publication lies with the authors. It does not necessarily reflect the opinion of the European Union or members of the ENNEREG Project Consortium. Neither the European Commission, nor the ENNEREG Project Consortium Members nor the authors are responsible for any use that may be made of the information contained herein.

This report on the **Evaluation of ENNEREG Communication and Dissemination Activities** provides an analysis of the dissemination activities of the ENNEREG project. In particular it evaluates the effectiveness of the online dissemination via the ENNEREG Regions 202020 website – www.regions202020.eu.

The aim of this **Summary Report**, is to illustrate the effectiveness of the **Regions 202020 website** and **Regions 202020 Network** as a dissemination, promotion, networking and communications **platform for Sustainable Energy Regions throughout Europe**.

It also aims to:

- Celebrate the success of the ENNEREG project dissemination actions
- Act as a Good Example of how promotion and communication activities can be implemented in European projects
- Illustrate the added value that can be achieved when projects with similar target audiences cooperate, as exemplified by the **Sustainable Energy Communities NEWS** which was produced by the ENNEREG project based on input and translation provided by 5 Intelligent Energy – Europe Sustainable Energy Communities projects: ENNEREG, city_SEC, come2CoM, Energy for Mayors and ENESCOM.
- **Inspire further regions to join the Regions 202020 Network** by registering online at: <http://www.regions202020.eu/register-en> and to add their region and its communities, stakeholder organisations and resources to the Regions 202020 website.

The results of this evaluation confirm that the **Regions 202020 Platform has successfully met the needs of the ENNEREG project** by ensuring that project publications and results reach its target audience both at the regional and European level ensuring support for regional actions in the ENNEREG regions and inspiring replication in Sustainable Energy Regions throughout Europe.

1 Introduction

This report provides an analysis of the dissemination activities of the ENNEREG project. In particular it evaluates the effectiveness of the online dissemination via the Regions 202020 website – www.regions202020.eu.

A summary and evaluation of the tasks carried out by the ENNEREG partners are included in this Section. In most cases, a direct link (URL/web address) to where each item can be found is included. As part of this evaluation, the number of page views (hits) for key web pages and resources has been analysed as a measure of the effectiveness of online, e-mail and regional-level dissemination by the project partners.

Additional actions were carried out by the Regional Partner and/or the Communications and Dissemination coordinator, CPL Scientific Publishing Services Ltd (CPL), for each region including:

- direct dissemination activities by each ENNEREG Region (such as events, promotion, presentations and good practice) to its regional and local stakeholders and at the European level
- indirect dissemination by each ENNEREG Region to its stakeholders and interested parties throughout Europe via the website Regions pages, Sustainable Energy Themes pages, events and online resources (including addition of presentations, e-bulletins, articles, images, etc., to the website).

The effectiveness of these dissemination activities by each region cannot be directly evaluated, hence has been viewed in context with the dissemination via the Regions 202020 website as a whole.

ENNEREG Regions 202020 Website – www.regions202020.eu

Figure 1 Regions 202020 website – www.regions202020.eu - home page – April 2013

As illustrated in Figure 1, as well as registration, events diary, news pages, background information about the ENNEREG project and consortium pages, the Regions 202020 website contains 4 main sections accessible from the menu on the left side of each page of the site:

A. REGIONS 202020 providing detailed profiles of the 12 ENNEREG Pioneer regions and their 12 twin regions, as well as resources and general information about **more than 200 additional European regions and local communities** throughout Europe. In addition, regions and local Communities involved in 4 other Sustainable Energy Communities projects (see D. below) are highlighted. A search facility in this section enables users of the site to **Find Local and Regional Sustainable Energy Communities** in the online database.

This section also includes the **Regions 202020 Network** which enables registered users to contact partners with similar interests, as well as update the entry for their region and add details of their organisation and resources to the database.

It was suggested during the ENNEREG project initiation phase that a **map linking the user to Sustainable Energy Regions** throughout Europe would be incorporated into this section of the website by integrating with the existing ManagEnergy map - www.managenergy.net/map.html detailing Regional Energy Agencies, Covenant Coordinators, Regions 202020 Regions and Regional events. However, the ManagEnergy map was not available until later in the project and required the permission of EACI decision makers and cooperation from the ManagEnergy service providers to implement. Hence, in the end budgetary limitations within these service contracts and the ENNEREG project, as well as EACI internal policy decisions prevented this approach from being feasible. Regions 202020 investigated creating its own map based on existing technology developed by the CPL web team, however, by this point in the project budget limitations meant that this was not feasible.

The website currently also provides brief country profiles which link to Regions in each country.

B. INSPIRATION providing access to the **Regions 202020 Inspiration Guide for Sustainable Energy Regions** developed under the previous ENNEREG project. The Inspiration section also currently includes **Good Practice** case studies relating to Sustainable Energy Projects in the ENNEREG regions.

A search facility enables users of the site to **Find Resources** including Good Practice, Films/Animations, Images, Policy and Legislation, Local and Regional Sustainable Energy Action Plans, Tools and Methodologies, Publications, Presentations and Proceedings from Events, etc.

C. SUSTAINABLE ENERGY THEMES including information (Technological and Instrumental Solutions; What ENNEREG/Regions 202020 Regions have been Doing and What Your Region Can Do; Good Practice and other Resources; EU Policy and Legislation; Thematic Events) in the following key topics: Sustainable and energy efficient buildings; Energy efficiency in industry; Energy efficient products; Sustainable transport; Renewable energies; Energy services; Intelligent Energy Education; Energy Monitoring.

The purpose of this section is to support the Inspiration Guide by providing real examples in specific thematic areas. **Regions 202020 Network** members are able to continue to add their own case studies and resources to these sections of the site after the end of the ENNEREG project period.

D. SUSTAINABLE ENERGY COMMUNITIES (SEC) As part of ENNEREG's collaboration with 4 other SEC projects (city_SEC, come2CoM, Energy for Mayors, ENESCOM), this section promotes the actions of these projects, and also gives website users access to various resources developed under several other EU-level actions and initiatives including ManagEnergy, the Covenant of Mayors, ISLE-PACT and other projects funded under the Intelligent Energy - Europe (IEE), Seventh Framework (FP7) and INTERREG programmes.

As illustrated in the Figure 2 below, by the end of the project:

- the website was being visited around 17-22 000 times each month (1 visit every 2 minutes)

- around 65-80 000 web pages were being viewed each month (2 page views every minute)
- more than 1 million web pages had been viewed during more than 327 thousand visits

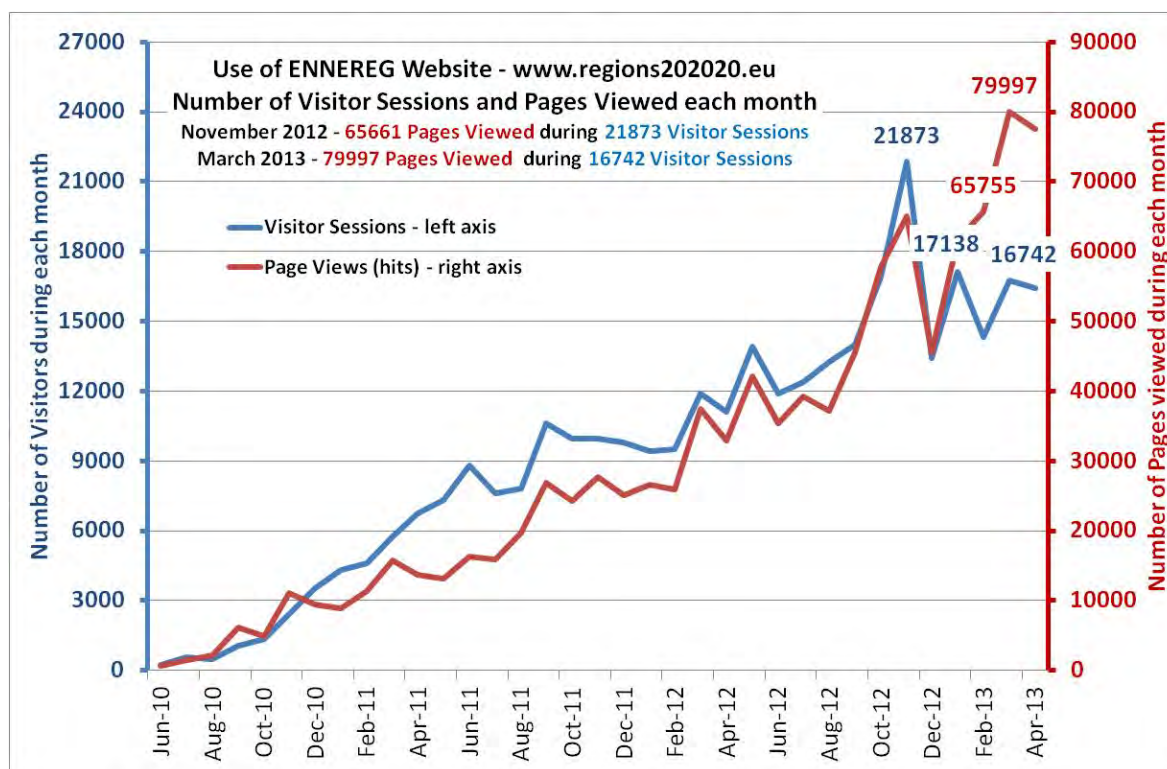

Figure 2 Growth in the use of the ENNEREG website – www.regions202020.eu from its launch in June 2010 to the end of the project in April 2013.

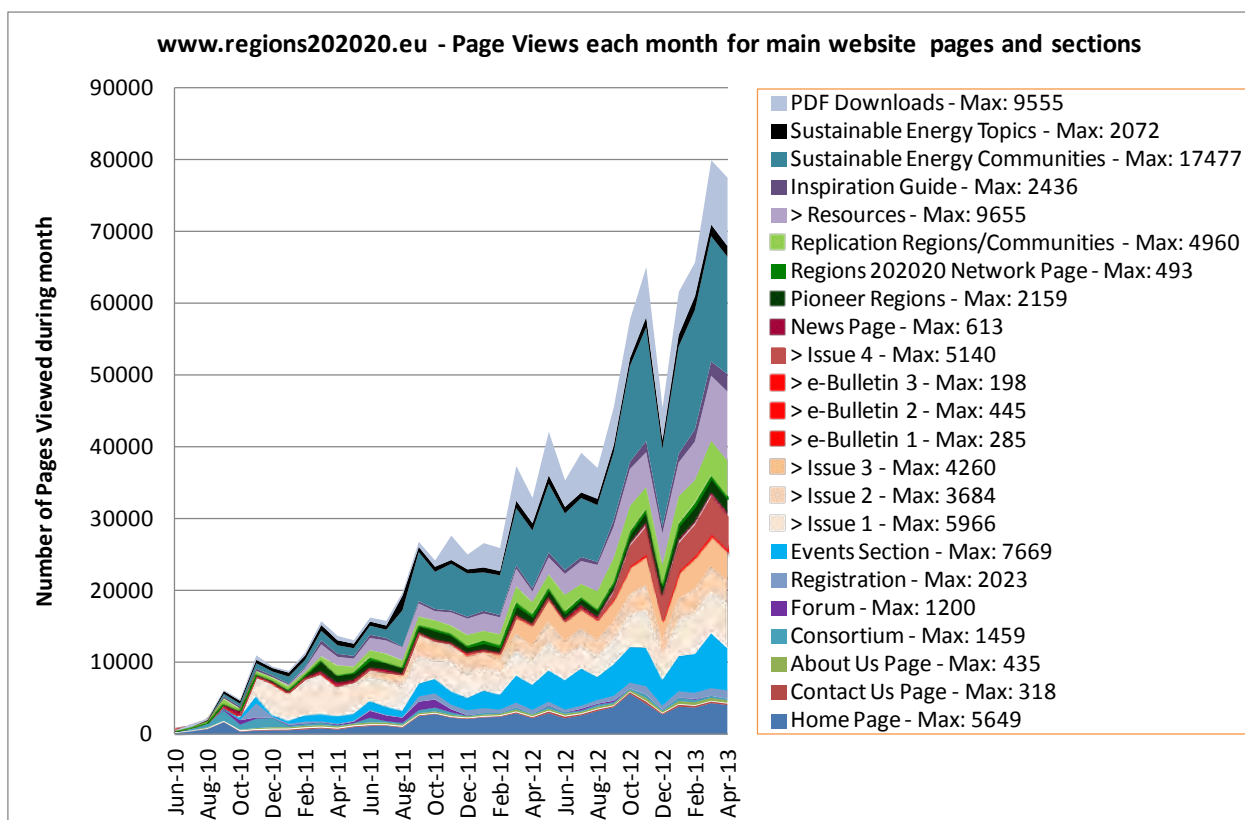

Figure 3 Regions 202020 page views each month for the main website pages and sections.

Figure 3 illustrates the number of page views in each of the main pages and sub-sections of the website. There was a consistent growth for all sections of the site, so that by the end of the project:

- The **website home page** received more than **5 000 page views** each month
- More than **17000** pages in the **Sustainable Energy Communities** section, which was particularly popular, were being viewed each month.
- The four issues of **Sustainable Energy Communities NEWS** continued to grow in popularity, receiving **4-6 000** page views per issue per month – totalling almost **20 000 page views per month** for the **News section** overall.
- More than **12 000 Inspiration Guide and Resource** pages were viewed each month.
- Almost **10 000 PDF publications** were downloaded each month.
- More than **2 000 pages** describing the **Pioneer regions** and almost **5 000 pages** describing the **Replication regions and communities** were being viewed each month.
- More than 7 000 pages in the Events section of the site were viewed each month.

An analysis of the depth of each visitor session show that although, as illustrated in Figure 4, around 50% of visitors to the website only view one page, and a further 20% only view 2 pages, **4% of visitors view more than 60 pages on each visit per month**. Or put another way, 70% of visitors view 18% of the pages, while a further 25% view 27% of the pages and a core 4% (750 visitors) view 55% of the pages.

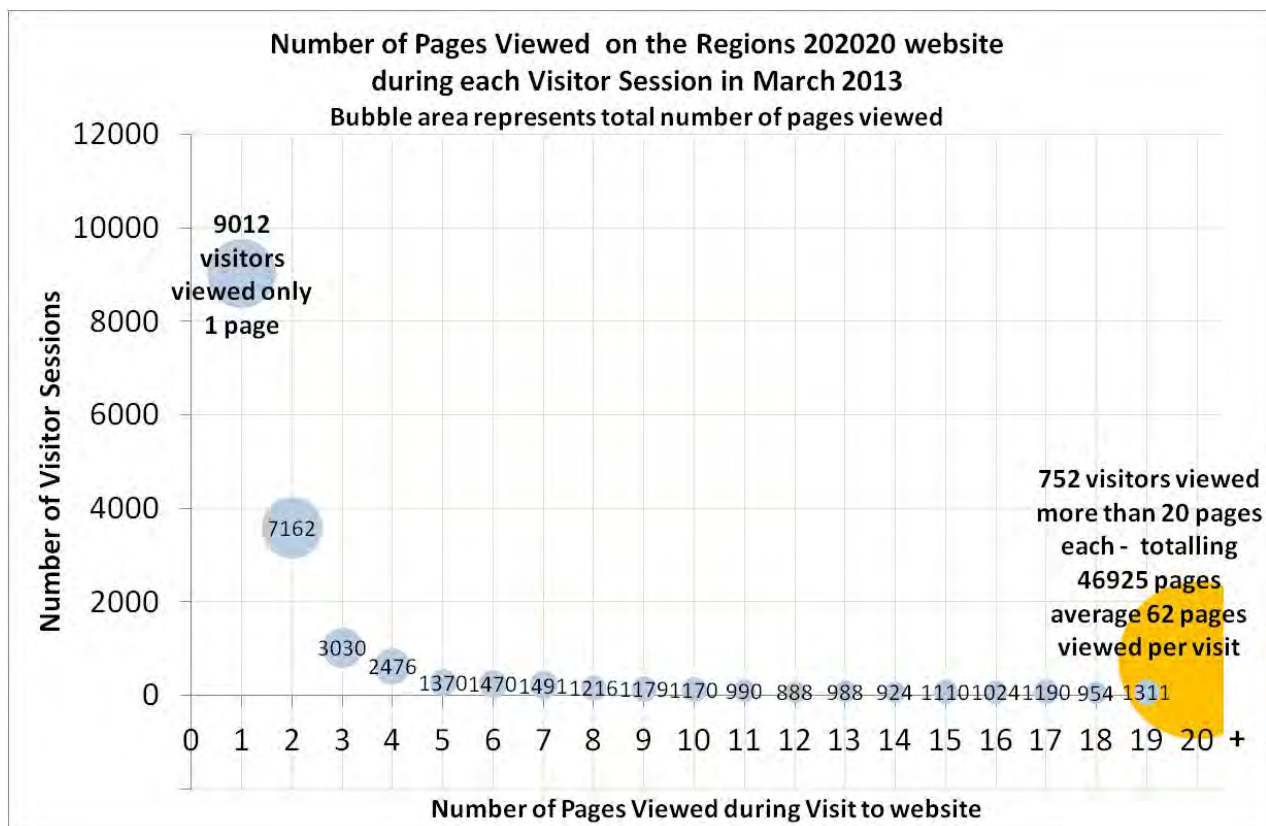

Figure 4 Number of Pages Viewed on the website during each visit in March 2013

Analysis of the length of time each visitor spent on the website during March 2013 is shown in Figure 5. Although 70% of visitor sessions (11698) had a duration of 0-10 seconds, 12% of visitors (2016) spent more than 10 minutes looking at the website and 6% (946) spent more than 30 minutes. This means that these **946 visitors** alone spent a **minimum total of 473 hours** viewing the website in March 2013. In total, the possible time spent by visitors to the site in this month ranges from 700 to in excess of 1700 hours.

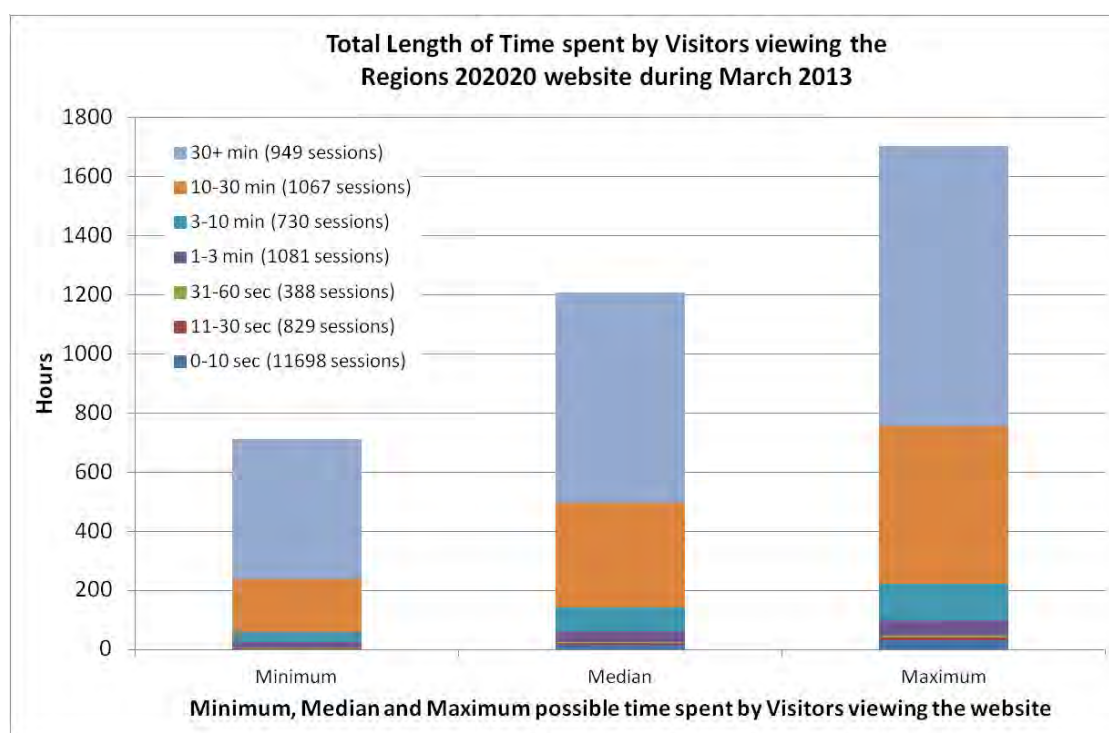

Figure 5 Estimated time spent by Visitors viewing pages on the Regions 202020 website in March 2013 based on actual length of visitor session statistics.

Region Page on www.Regions202020.eu

Partners created and regularly updated their region and twin region page(s) on the ENNEREG EU Regions 202020 website in English (and their local language if appropriate). An example of a Region page is shown in Figure 6.

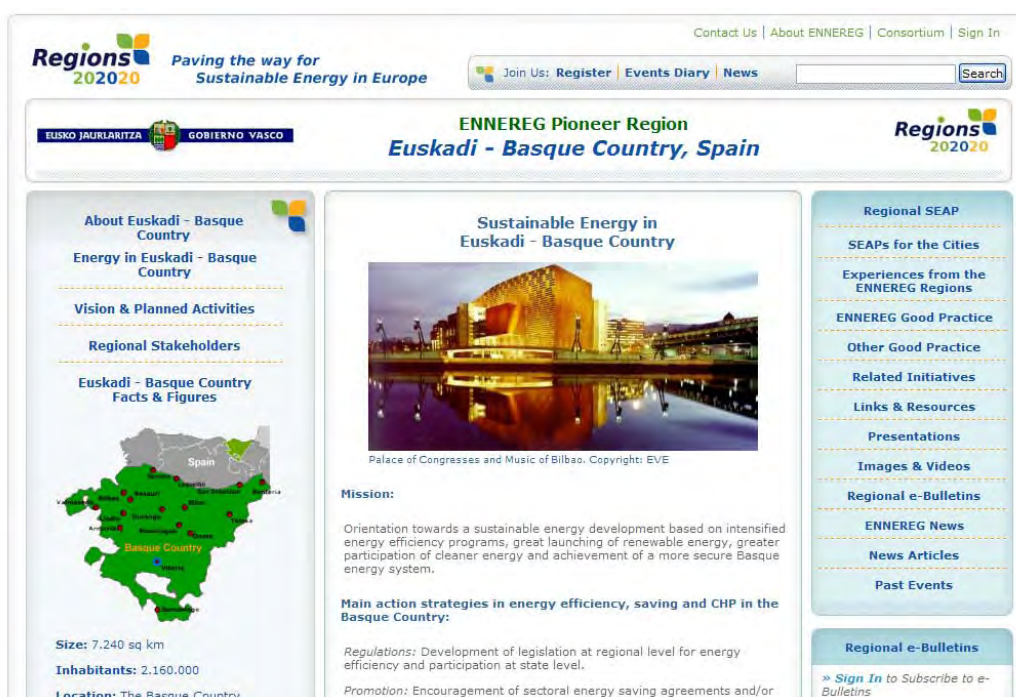

Figure 6 Region Page for ENNEREG Pioneer Region
Euskadi (Basque Country), Spain – www.regions202020.eu/basque

The map, right, shows the ENNEREG Pioneer Regions (blue circles) and their twin regions (pink squares). ENNEREG Twin Region Pages were produced by most ENNEREG Regional partners in the last few months of the project.

The ENNEREG Pioneer and Twin Region pages as well as the pages for their local communities can be found on the website by clicking on the links below:

[Cardiff](#) - come2CoM Community
[Powys County](#) - ENESCOM Region
 Twinned with IE: [Mid-West Region](#)

Figure 7 shows the total number of times each individual Region Page was viewed during the project. The figures for the Triangle Region are higher than the other regions because this Region page was the first to be published and was promoted as an example of a Region Page in the first newsletters, e-Bulletins, etc. During the last 8 months of the project, the ENNEREG Pioneer Region pages were each viewed 3-16 times each day. It should be noted that some of the ENNEREG Twin Region pages were created in the last month of the project, hence their page views are not do not show in the statistics. In total these 24 pages were viewed approximately 26250 times during the project period.

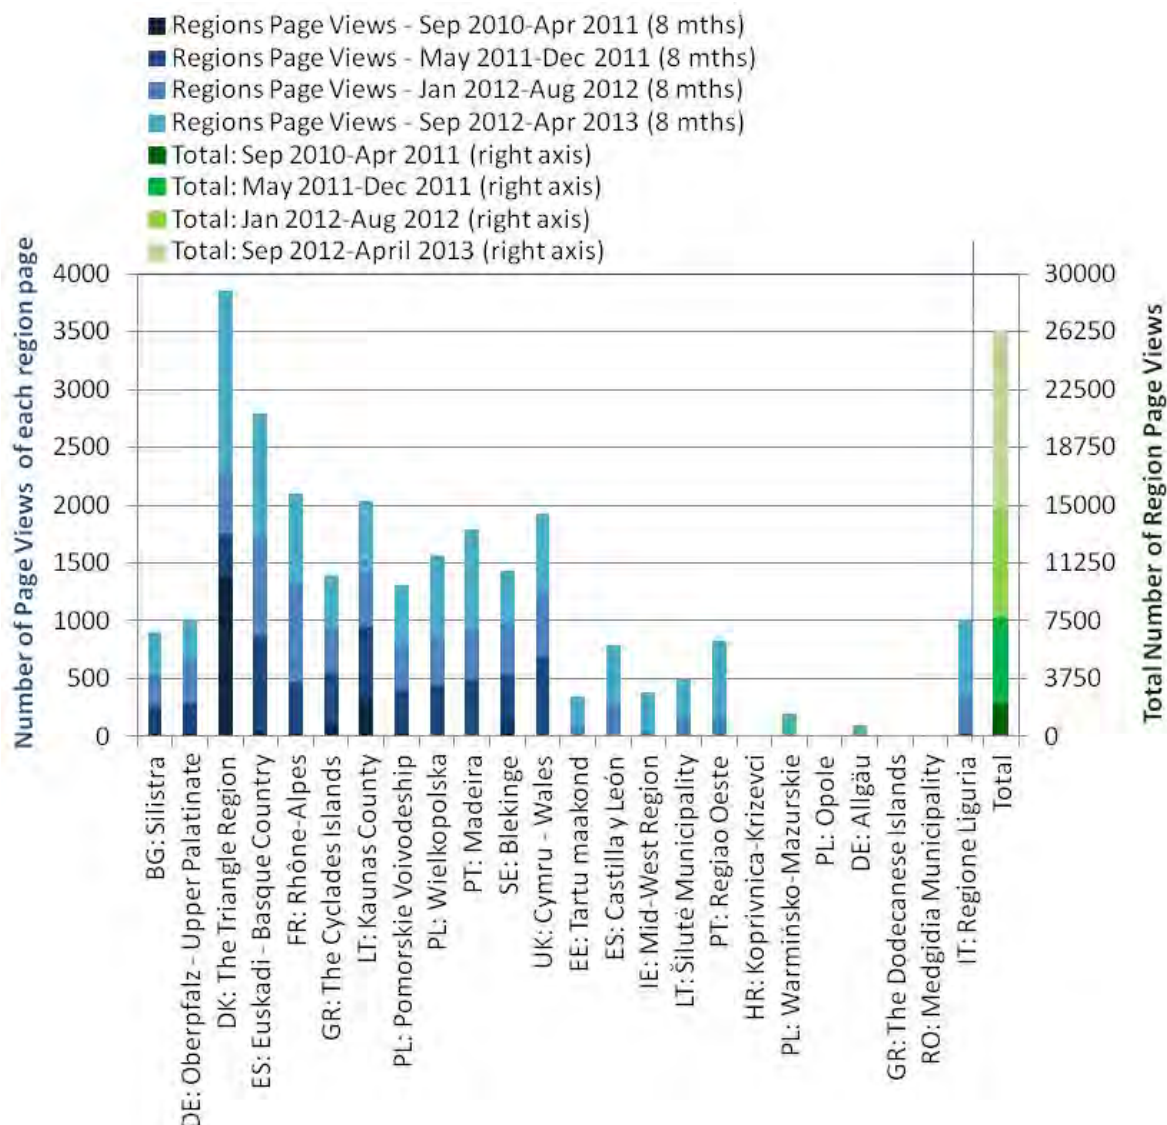

Figure 7 Number of times each ENNEREG Region page was viewed during the project period

A number of resources were added to the website by the ENNEREG project partners related to activities in the ENNEREG Pioneer regions. Figure 8 illustrates how many resources are listed on each ENNEREG pioneer region page, ranging from 36 on the Silistra page to 85 on the Basque Country page. In total there are 641 resources on the Regions 202020 website of which 431 appear on these pages.

Figure 9 illustrates on average how many times each of the resources on each Region page have been viewed during the last 16 months of the project (1 January 2012-30 April 2013). This varies from 85.19 page views for resources on the Wielkopolska page to 122.48 for each resource on the Basque page. In total **69724 of these resource pages** were viewed in the period, equivalent to **more than 140 resources pages relevant to the ENNEREG Pioneer Regions viewed each day.**

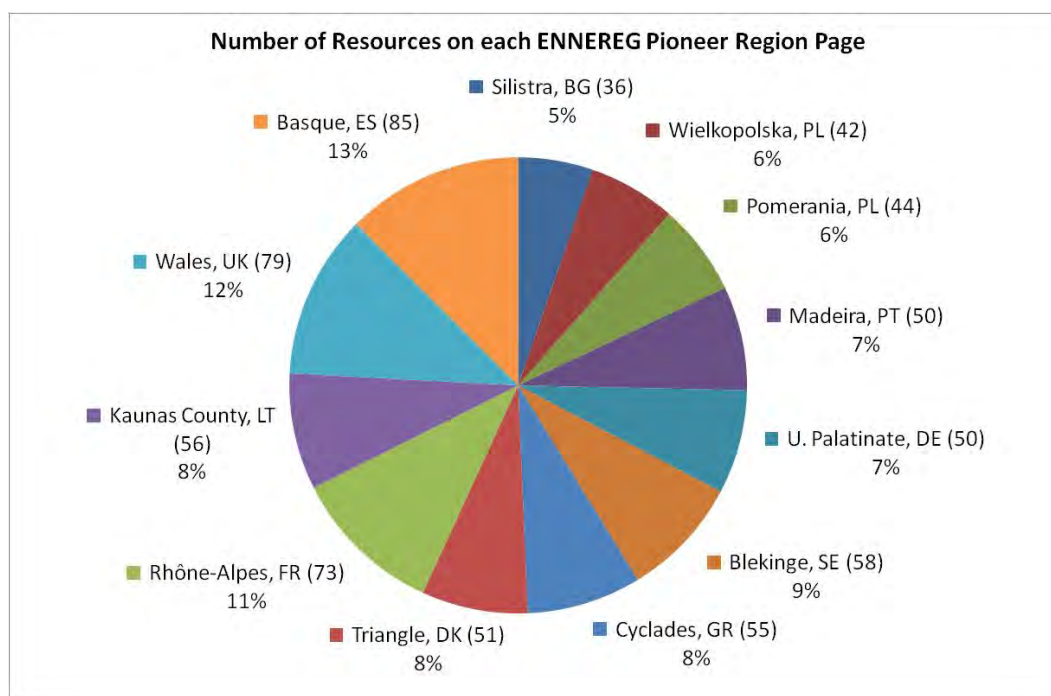

Figure 8 Number of Resources listed on each ENNEREG Pioneer Region Page

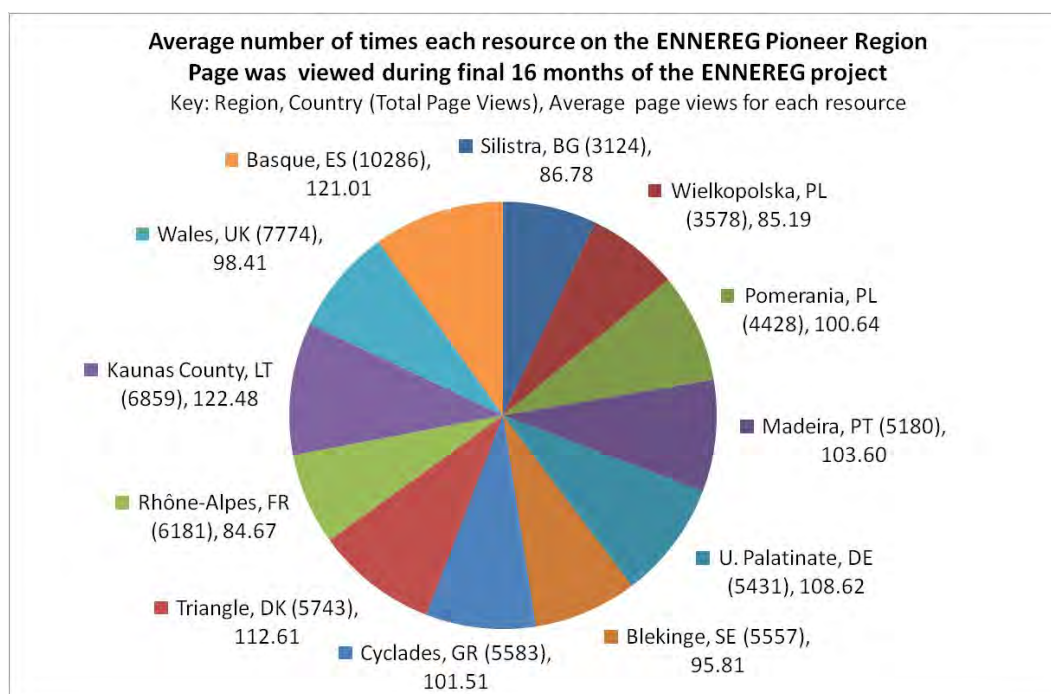

Figure 9 Average number of times each of the Resources listed on each ENNEREG Pioneer Region Page was viewed during 16 month period from 1 January 2012 to 30 April 2013

Regional Website

The partners were responsible for creating a project page on their own website (in local languages if necessary for local dissemination activities); and informing CPL of the address for their local page. The ENNEREG Regions Pages on the Regions 202020 website include links to these local websites.

Each website included:

- A general description of the project and link to the main project website;
- An update on the partners progress in the ENNEREG project;
- Contact details for the specific project partner;
- Details of the partner's roles, activities and achievements in the project;
- Links to their ENNEREG Partner Webpage and Regional E-bulletin

Where available, in Part 2 of this report each regional partner has provided website and/or webpage use statistics (downloads, page views and visitors) for their regional website.

Sustainable Energy Theme

The activities in the ENNEREG Regions focus on **eight key Sustainable Energy themes (SETs)**. Figure 10 shows the Sustainable / Energy Efficient Buildings SET page on the Regions 202020 website.

*Figure 10 The **Sustainable / Energy Efficient Buildings** sustainable energy themes (SET) page on the Regions 202020 website*

Click on the links below or in the Sustainable Energy Themes menu on the website to go to the SET Pages and find out more about:

- Technological and Instrumental Solutions
- What ENNEREG Regions have been Doing including Good Practice and Experiences from the ENNEREG Regions
- What Your Region Can Do
- Good Practice and other Resources
- EU Policy and Legislation
- Thematic Events

in the following key topics:

- Sustainable and energy efficient buildings - <http://www.regions202020.eu/themes/buildings/>
- Energy efficiency in industry - <http://www.regions202020.eu/themes/industry/>
- Energy efficient products - <http://www.regions202020.eu/themes/products/>
- Sustainable transport - <http://www.regions202020.eu/themes/transport/>
- Renewable energies - <http://www.regions202020.eu/themes/renewable-energy/>
- Energy services - <http://www.regions202020.eu/themes/energy-services/>
- Intelligent Energy Education - <http://www.regions202020.eu/themes/education/>
- Energy Monitoring - <http://www.regions202020.eu/themes/energy-monitoring/>

Each Sustainable Energy Theme page has been created by CPL, the ENNEREG Promotion and Communications Coordinator, based on input provided by each Topic leader. Each Topic leader is able to edit their SET page and has been responsible for ensuring that the SET page is up-to-date and for adding resources to the page.

Figure 11 shows the total number of times each individual SET Page was viewed during the project, with the number of page views for all SET pages increasing significantly in each 8-month period. Particular interest and increase in page views can be seen for the **Sustainable Energy Buildings** and **Renewable Energies** pages. Interest in these pages has increased from 50-70 views each month per page for the period September 2010-April 2011 to 125-325 views each month in the last 8 months of the project – equivalent to 4-11 times per page each day. In total these 8 pages alone were viewed more than 24,600 times during the project period.

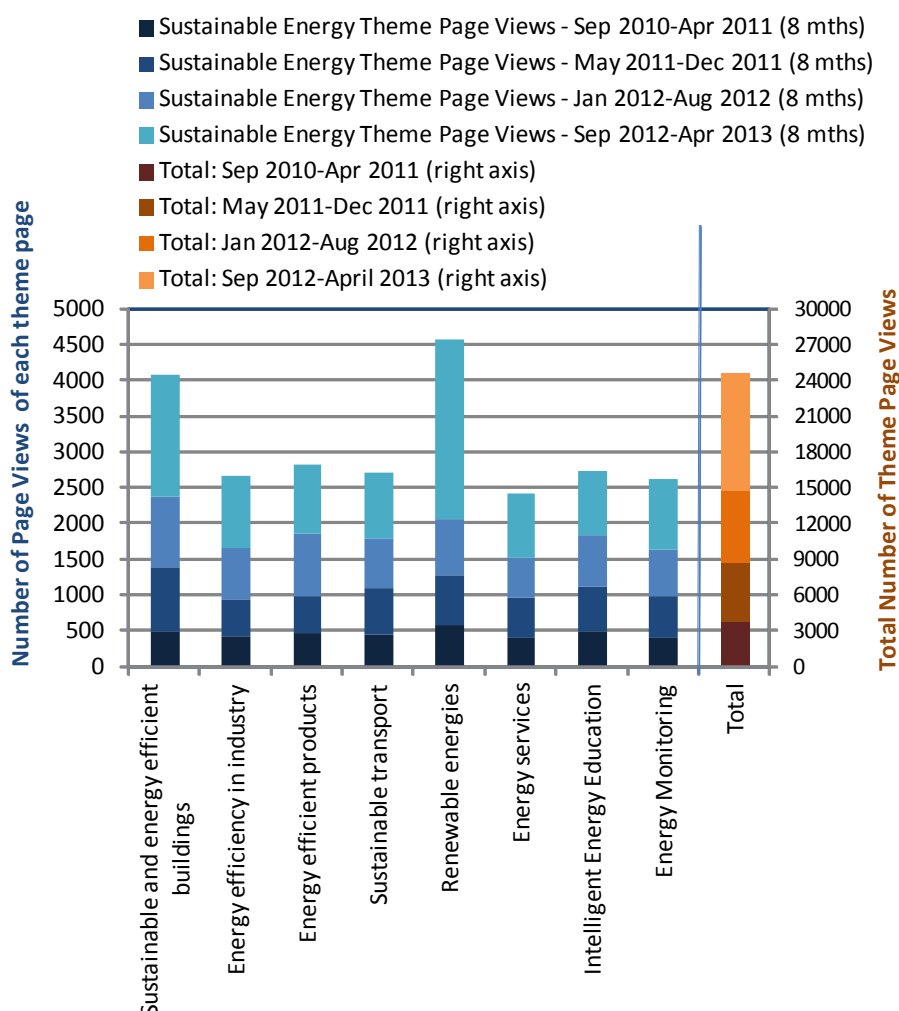

Figure 11 Number of times each ENNEREG SET page was viewed during the project period

An additional “Financing & Funding” Thematic Page was added to the site in February 2012 as part of the Inspiration Guide. This can be found at: <http://www.regions202020.eu/cms/inspiration/finance-funding/>

Figure 12 illustrates how many resources are listed on each ENNEREG SET page, ranging from 59 on the Finance and Funding page to 212 on the Renewable Energies page. In total there are 641 resources in the Regions 202020 database of which 469 appear on these pages.

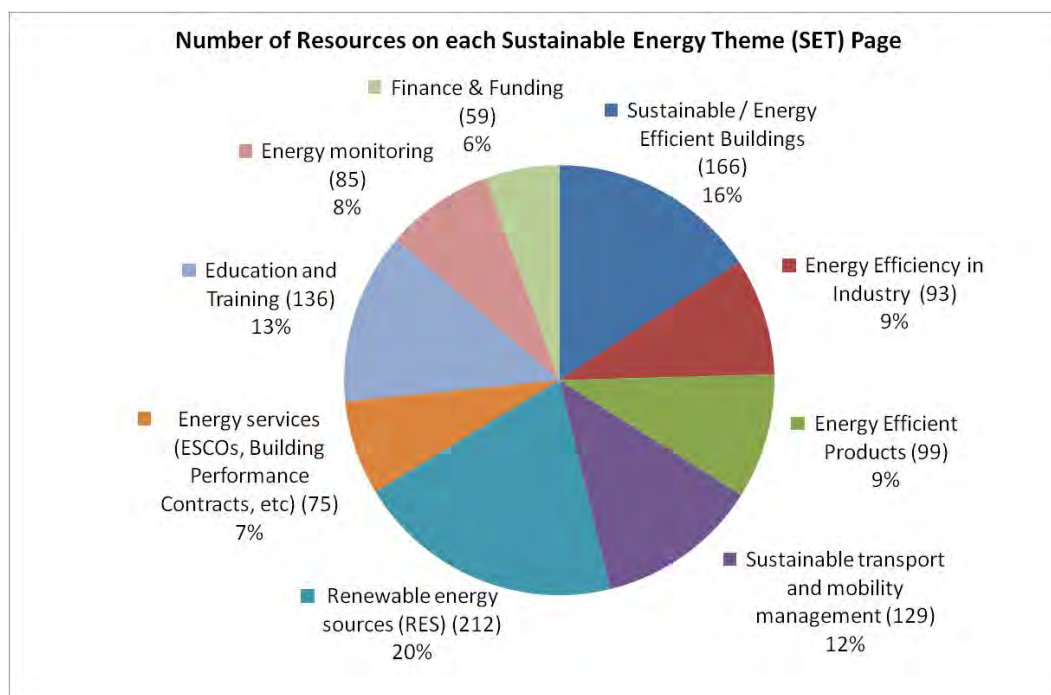

Figure 12 Number of Resources listed on each ENNEREG Sustainable Energy Theme (SET) Page

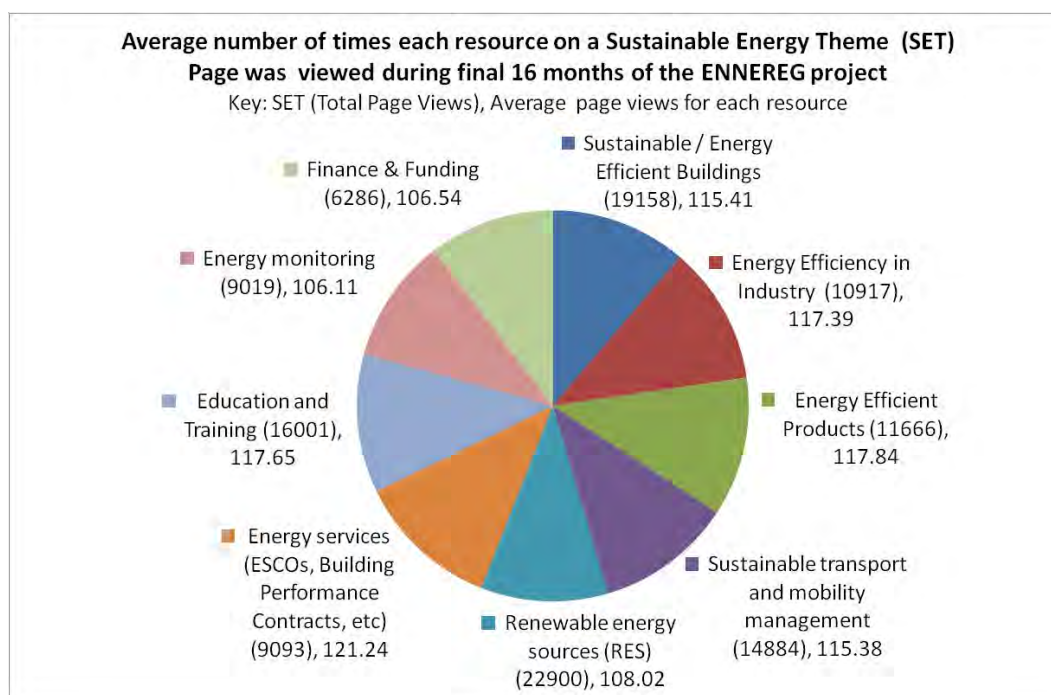

Figure 13 Average number of times each of the Resources listed on each ENNEREG Sustainable Energy Theme (SET) Page was viewed during 16 month period form 1 January 2012 to 30 April 2013

Figure 13 illustrates on average how many times each of the resources on each SET page have been viewed during the last 16 months of the project (1 January 2012-30 April 2013). This varies from 106.11 page views for resources on the Energy Monitoring page to 121.24 for each resource on the Energy Services page. In total **113638 of these resource pages** were viewed in the period, equivalent to **more than 230 resource pages relevant to the ENNEREG Sustainable Energy Themes viewed each day**.

Regional newsletters / e-Bulletins

Each ENNEREG region aimed to schedule, design, edit, produce and disseminate at least two regional newsletters per year. This generally consisted of a short e-bulletin to a local e-mailing list in English and/or their local language (as appropriate to the target audience), in order to ensure information from the project is disseminated to the regional communities (stakeholders, citizens...). These e-bulletins included material from the ENNEREG e-bulletin or Sustainable Energy Communities News and/or specific news about the ENNEREG Project Partner's action in the region.

Further details about the dissemination activities by each ENNEREG Regional Partner in local newsletters and e-Bulletins have been included by each regional partner in Part 2 of this Report.

European-level e-Bulletins and Articles

Each region also provided articles for publication in the project e-Bulletins and Sustainable Energy Communities NEWS relevant to the region's stage in their progress towards Regional Sustainable Energy Action(s). Wherever possible, this was supported by print-quality photographs, and other illustrative materials, such as, videos, slide presentations etc.

These articles appear in the News section of each ENNEREG Pioneer or Twin Region's page on the ENNEREG website, as appropriate.

CPL prepared 4 ENNEREG project e-bulletins in English from materials provided by the project partners:

ENNEREG - e-Bulletin December 2011 In this e-Bulletin we summarised the status of the project after the first 18 months, providing information on the progress of the **12 ENNEREG Pioneers** towards becoming Sustainable Energy Regions, as well as the role that Regions can play in achieving the 20-20-20 European objectives. We also explained how, during the second half of the project, the ENNEREG Pioneers would work with **ENNEREG Twins and Replication Regions** to inspire development and implementation of **Sustainable Energy Action Plans (SEAPs)** and **Projects (SEPs)** throughout Europe. This e-Bulletin also outlined how regions and local communities could become involved in **Paving the Way for Sustainable Energy in Europe** by **exchanging experience** via the **Regions 202020 Network**, or replicating the actions described in the **Good Practice** section of the website.

<http://www.regions202020.eu/news/e-bulletin-1-en/>

ENNEREG - e-Bulletin September 2012 - This second e-Bulletin provided information on the **ENNEREG conference in Bilbao, Spain** as well as presentations from past events, including the ENNEREG conference in Poznan. It also launched the first version of the **Regions 202020 Inspiration Guide**, provided details of **ENNEREG Replication Events and activities**, including in the **ENNEREG Twin Regions**, as well as an update

of actions in **ENNEREG Pioneer Regions**. Finally, it summarised **14 new ENNEREG Good Practice Case studies**, added to the website since the first ENNEREG e-Bulletin was published in December 2011.
<http://www.regions202020.eu/news/e-bulletin-2-en/>

ENNEREG - e-Bulletin March/April 2013 - This third e-Bulletin provided information on the **IEE Sustainable Energy Communities conference** in Brussels, Belgium on 18 March 2013 as well as presentations from the **ENNEREG Advisory Board Meeting** on 19 March 2013 and **Regions 202020 Workshop and Technical Visits** in Bilbao, Spain on 8-9 November 2012. It also included links to the reports from the **Regions 202020 Inspiration Resource Pack** distributed during these meetings.
<http://www.regions202020.eu/news/e-bulletin-3-en/>

ENNEREG - e-Bulletin May 2013 - Regions 202020 Inspiration Guide for Sustainable Energy Regions - This fourth and final e-Bulletin provided an update on the **Regions 202020 Inspiration Guide for Sustainable Energy Regions**. The online version of the **Inspiration Guide** was officially launched in March 2013 and was published on DVD-ROM in May 2013.
<http://www.regions202020.eu/news/e-bulletin-4-en/>

In addition, the ENNEREG project Communications and Promotions Coordinator, CPL, sent a number of e-Mailshots to registered organisations informing them about ENNEREG project activities. By the end of the project, 698 regional and local stakeholders had registered with Regions 202020 of which 688 had joined the Regions 202020 Network.

405 of these registrants (59%) specified their type of organisation when they registered on the Regions 202020 website:

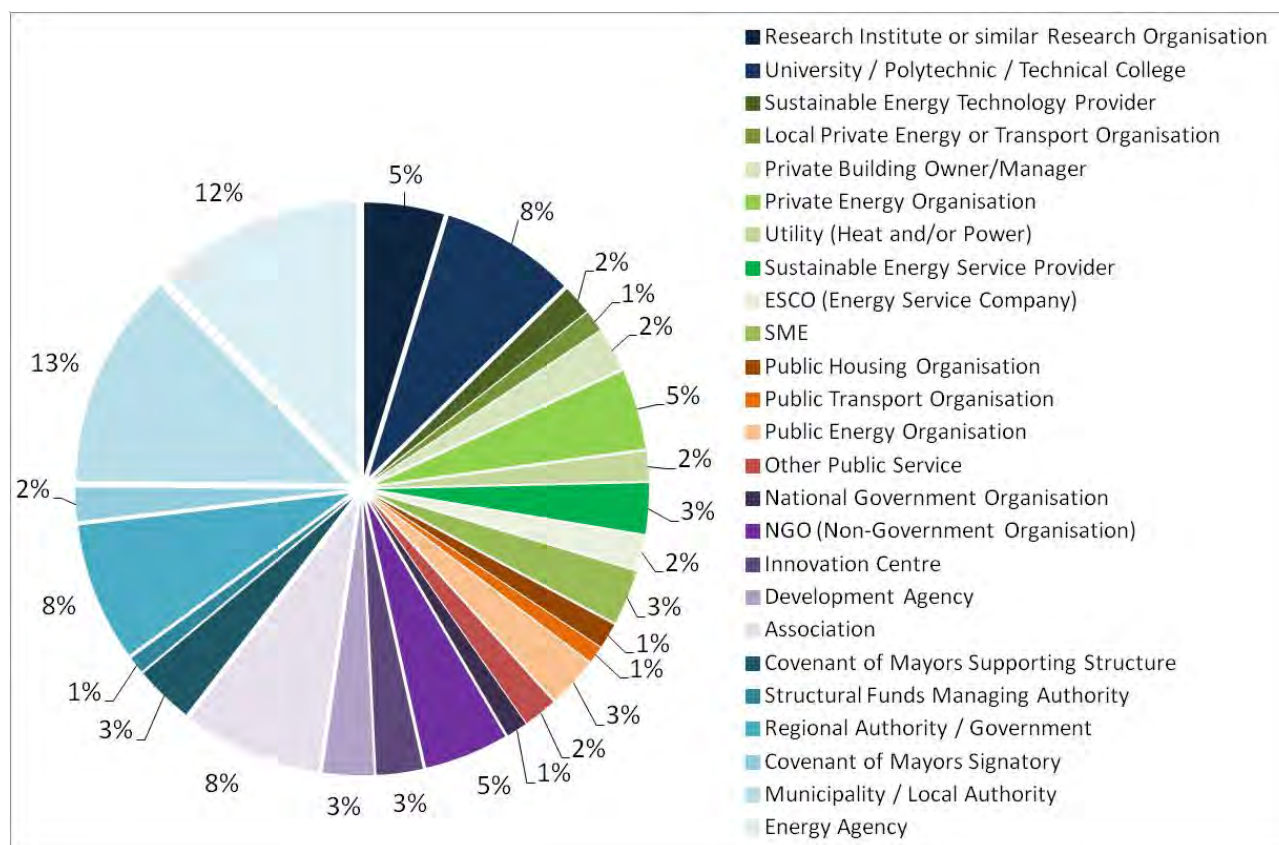

Figure 14 Types of Organisations represented by Regions 202020 website Registrants

As illustrated in Figure 14 above, these registrants represent a wide range of organisation types as follows:

- 40% of registrants represent Local and Regional Energy Actors (including regions, municipalities and energy agencies)
- 20% represent other government and non-government organisations and associations
- 7% represent public housing, transport, energy and other service organisations
- 20% represent private organisations
- 13% represent education and research organisations

Figure 15 illustrates how publication of SEC NEWS, e-bulletins and e-mail promotion of events and publications directly led to both a short- and long-term increase in visitors and page views on the Regions 202020 website.

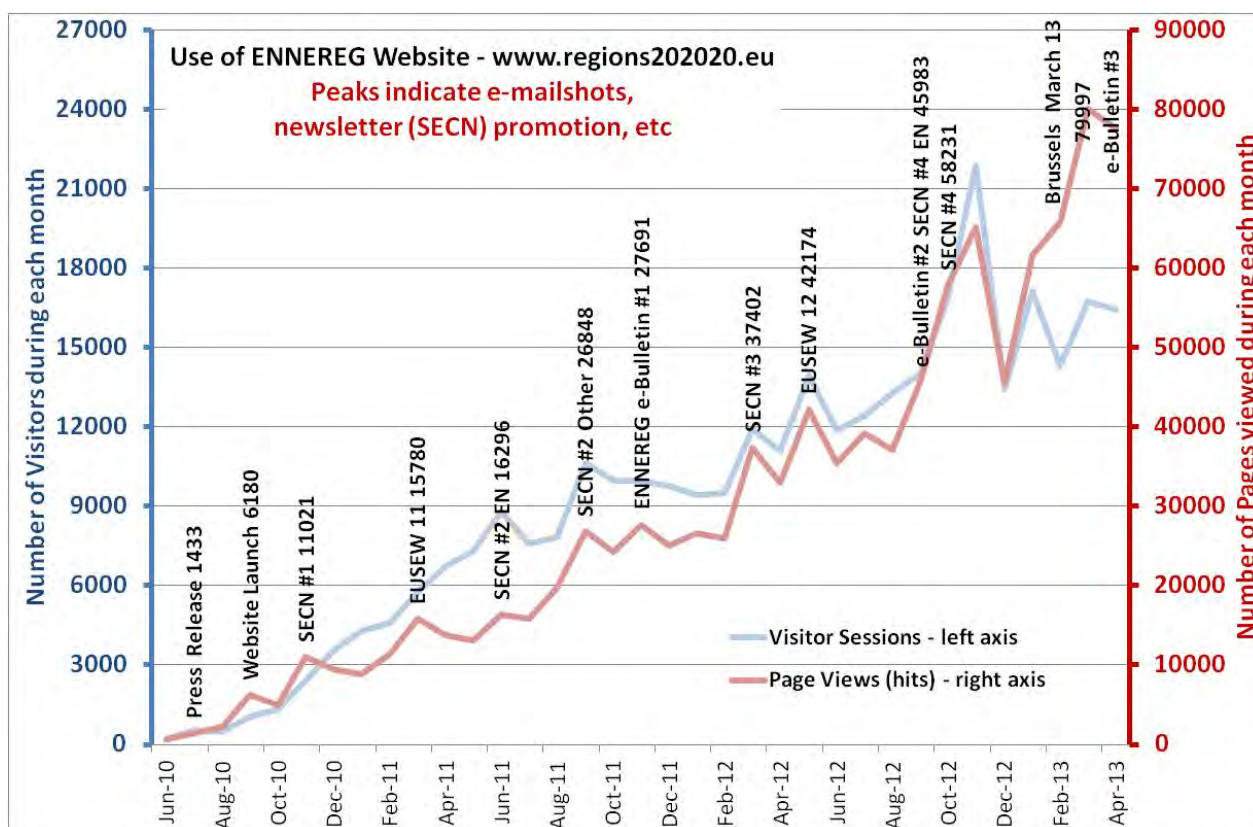

Figure 15 The impact of Promotional activities on dissemination via the Regions 202020 website in both the short- and long-term.

Sustainable Energy Communities News

The Regions 202020 website hosted the Sustainable Energy Communities (SEC) newsletter for a cluster of five **Intelligent Energy - Europe (IEE) Sustainable Energy Communities** projects which all include activities connected to, or supporting the Covenant of Mayors. The first issue of the Newsletter was published in **Autumn 2010** in **English** on **15 November 2010**.

CPL prepared articles for the Sustainable Energy Communities NEWS from materials provided by ENNEREG project partners as well as the four other Sustainable Energy Communities Projects. The articles were then translated by regional members of the 5 projects. CPL then published the translated newsletters on the website.

Figure 16 Screen shot of an article from Issue 4 of Sustainable Energy Communities NEWS in Bulgarian

The summary from each newsletter is displayed below. Click on the links to view the Newsletters in multiple languages.

[Sustainable Energy Communities NEWS - Issue 1 Autumn 2010](#)

In May 2010, five Intelligent Energy - Europe (IEE) Sustainable Energy Communities (SEC) projects joined forces to disseminate news and information on innovative local action that can inspire cities and regions to meet EU targets for 2020 on greenhouse gas emissions, energy efficiency and use of renewable energy. The five projects - **ENNEREG**, **Energy for Mayors**, **City_SEC**, **come2CoM** and **ENESCOM**, which represent more than 100 communities throughout Europe, are producing this joint newsletter in several European languages to be sent to thousands of sustainable energy actors.

[Sustainable Energy Communities NEWS - Issue 3 Winter/Spring 2012](#)

The third issue of Sustainable Energy Communities NEWS newsletter provides an update on the activities of the five projects - **ENNEREG, Energy for Mayors, City_SEC, come2CoM** and **ENESCOM** – during their second year since May 2011, highlighting specific actions in Regions and Communities throughout Europe.

Image: Environmentally-friendly Christmas Decorations, Kaunas City, Lithuania

Details of several [forthcoming events](#) are included in the **Events Diary** section of this website. Partners from the **5 Sustainable Energy Communities Projects** have been involved in several events since [Issue 2](#) of Sustainable Energy Communities News, with reports, presentations and conclusions from these [past events](#) available in several languages.

Languages: [EN](#) [BG](#) [CA](#) [DE](#) [EL](#) [ES](#) [HR](#) [IT](#) [LT](#) [PL](#) [PT](#)

[Sustainable Energy Communities NEWS - Issue 4 Autumn 2012](#)

Sustainable Energy Communities NEWS highlights the activities of five **Intelligent Energy - Europe** projects that promote innovative local action, inspiring cities and regions to meet EU targets for 2020 on greenhouse gas emissions, energy efficiency and use of renewable energy. The work of the projects started in May 2010 and, although the **come2CoM** project ended in May 2012 and **ENESCOM** finishes in November 2012, three of the projects -

ENNEREG, Energy for Mayors and **City_SEC** - continue until April 2013. This will be the last issue of the **Sustainable Energy Communities NEWS** published by the **ENNEREG** project, however, this website will continue to be updated during 2013 and will be available online until at least 2015. The ENNEREG project is also in the process of creating an **Inspiration Guide** on this site, with a separate publication available in early 2013, and news of other final project publications from **ENNEREG, Energy for Mayors, City_SEC** and **ENESCOM** will be disseminated as they become available. If you would like to receive information about these publications, or you would like to add content to this website on **Sustainable Energy Action Plans (SEAPs) and Projects (SEPs) in your Region and/or local Community**, [register to join the Regions 202020 Network](#).

Languages: [EN](#) [BG](#) [CA](#) [CS](#) [DE](#) [EL](#) [ES](#) [HR](#) [HU](#) [IT](#) [LT](#) [PL](#) [PT](#) [RO](#) [SK](#) [SL](#)

By the end of the project, articles in all 17 languages from the first issue of SEC NEWS had been viewed almost 117,000 times.

The second issue was published in English in June 2011, with other languages published July-September as translations were received; the translated versions were emailed to registrants in September 2011 to ensure registrants were informed after the holiday period. By the end of the period to 31 August 2012, articles from issue 2 had been viewed more than 35000 times; this had increased to more than 60,000 by the end of the project.

Issue 3 of SEC NEWS was published in English in February 2012 with 10 other language versions added in March 2012. By the end of the project, the articles from this newsletter had been viewed more than 45,000 times.

Issue 4 of SEC NEWS was published in English in August 2012 with 15 other language versions added during November 2012. By the end of the project, the articles from this newsletter had been viewed almost 30,000 times.

Figure 17 illustrates how sustained promotion via e-mailshots, at events and via search engines effectively ensured, both in the short- and long-term, that articles in SEC NEWS and ENNEREG e-bulletins were viewed, so that by the end of the project, more than 18,000 articles were being viewed each month.

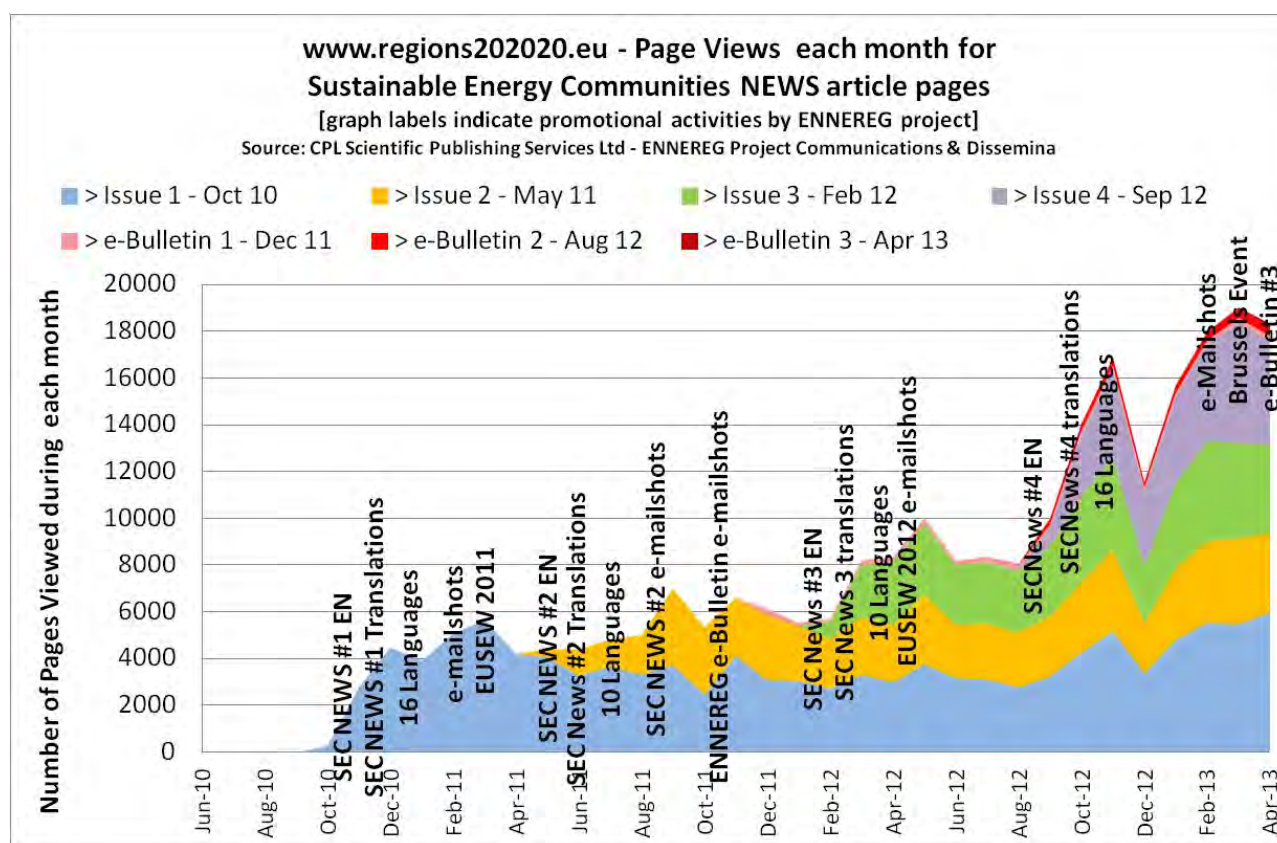

Figure 17 Page Views each month for Sustainable Energy Communities NEWS and ENNEREG e-Bulletin articles illustrating the impact of promotional activities both in the short- and long-term.

Figure 18 below shows the number of articles viewed from each language and issue of SEC NEWS since the first newsletter was published in September 2010. As illustrated, English versions of the newsletters tend to be 2-3 times more popular than translations, with interest in articles from early issues of SEC NEWS being maintained over time.

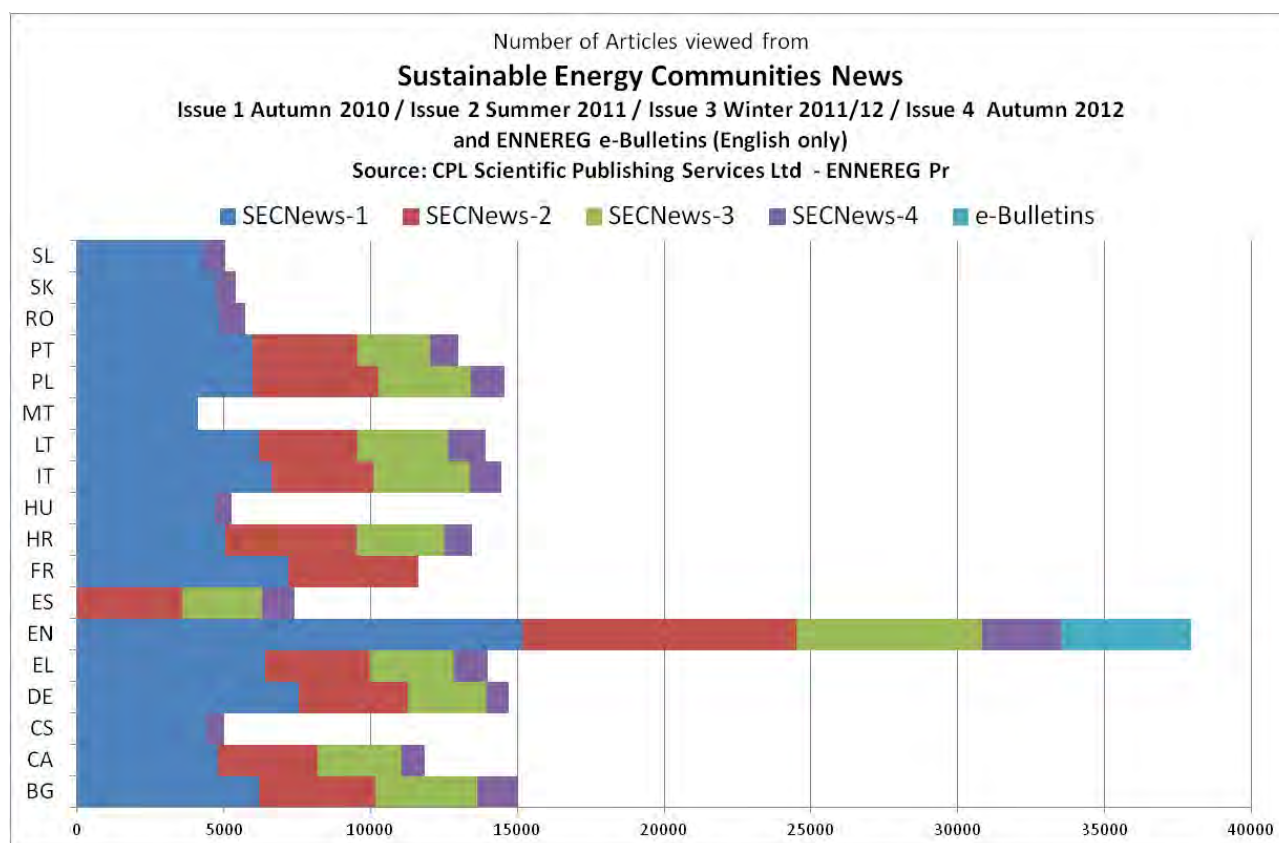

Figure 18 Number of times each article from Sustainable Energy Communities News and the ENNEREG e-Bulletins (English only) had been viewed in each language during the ENNEREG project period. Note, not all issues of the online newsletters were available in all 17 languages.

Events

Organisers of ENNEREG and other relevant public events provided information about their events to CPL to add to the website.

After each event, the organizer uploaded presentations and other event resources to the website using the online 'Add a Resource' tool. All Regions 202020 Network members can add resources to the website. The type of resource (e.g. "Presentation" or "Event Conclusions") and the name of the event can be selected from the drop-down box on the online form so that the resource appears on the correct event page on the website. By selecting region and thematic keywords, the event organiser can also ensure that the resource appears on other relevant pages.

All the events, including past events, appear on the Events Diary page of the website:

<http://www.regions202020.eu/events>

More than 100 events were listed in the event diary on the website by the end of the project, including all ENNEREG public events. The event diary was viewed more than 7000 times during the course of the project, with a total of almost 90,000 event-related pages and resources being viewed.

Around 30% (214) of the resources on the Regions 202020 website at the end of April 2013 were linked to a specific event. Of these, around 75% (166) were from the ENNEREG project, while the rest were related to other IEE funded Sustainable Energy Communities projects, ManagEnergy, Covenant of Mayors or other relevant European projects.

The event resources included:

- 135 Presentations in various European languages
- Reports and conclusions from 18 events
- 10 films or animations
- 51 publications, good practices and leaflets disseminated at the events

Website viewing statistics and links to the 20 most popular events can be found in Annex 2.2

Good Practice

128 Good Practice Case studies (GPs) were published during the project.

The ENNEREG project published more than 125 Good Practice Case Studies within **eight key Sustainable Energy themes**:

- [Sustainable and energy efficient buildings](#)
- [Energy efficiency in industry](#)
- [Energy efficient products](#)
- [Sustainable transport](#)
- [Renewable energies](#)
- [Energy services](#)
- [Intelligent Energy Education](#)
- [Energy Monitoring](#)

Each of the case studies includes the following sections:

- Summary
- Aims and Objectives of the Sustainable Energy Action
- Results and Impacts, including:
 - Start and End Date
 - Cumulative investment made by stakeholders in sustainable energy (kEuro)
 - Carbon dioxide emissions saved (t/period)
 - Energy saved (MWh)
 - Other relevant project outcomes / impacts
- Technical and Financial Implementation
- The Partners and Stakeholders
- Lessons Learnt
- How this Action could be Replicated
- ENNEREG Contact
- Sources of Further Information

The ENNEREG Good Practice case studies, as well as Good Practice collections and publications from other projects and initiatives, can all be found on the following page of the website:

<http://regions202020.eu/cms/inspiration/good-practice/>

Further information on dissemination of these and other resources can be found the section below.

Image Library

In total, 54 high resolution images and 24 videos and animations have been included in the image library. All images from the website can be found on the DVD-ROM version of the Inspiration Guide (see next section). Each Region and Sustainable Energy Theme page of the website also has an “Images & Videos” section. For example:

- the Transport images and videos can be found at: www.regions2020.eu/themes/transport/#videos
- the Kaunas region images and videos can be found at: www.regions2020.eu/kaunas/#videos

Website users can also search for images and videos in the Database of Resources at:
<http://www.regions2020.eu/inspiration/resources/>

Inspiration Guide

The final version of the **Regions 2020 Inspiration Guide for Sustainable Energy Regions** (illustrated in Figure 19, below) was launched in March 2013. The Inspiration Guide includes links to examples and experience from Pioneer and Replication regions, as well as Good Practice case studies and key European resources in order to inspire and assist regions throughout Europe to become Sustainable Energy Regions. Each regional partner produced a report entitled “**Inspiration Guide for Regional Decision-makers**”. These reports were integrated into the Inspiration Guide during the last 6 months of the project. In addition, public project reports summarising the key findings of the project have been integrated into the final version of the Guide as “**Experiences from the ENNEREG Regions**”.

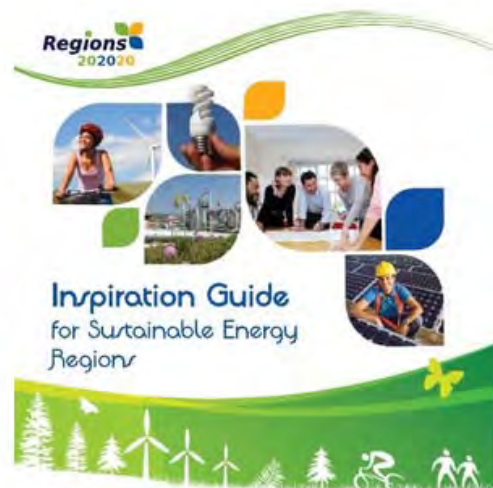

Figure 19 Home page and menus from the Regions 2020 Inspiration Guide for Regional Decision Makers

The Intelligent Energy - Europe project “ENNEREG - Regions paving the way for a Sustainable Energy Europe” officially launched its **Inspiration Guide for Sustainable Energy Regions** in March 2013.

Via the **Regions 202020 Inspiration Guide**, the ENNEREG project partners aim to provide all the information you need to become a Sustainable Energy Region:

- The guide helps you to decide where to start and what to do next in your journey to become a Sustainable Energy Region
- Ensure long term benefits for your Region, its stakeholders and citizens
- Protect the environment by using local renewable energy sources and minimising energy use
- Boost the economy and creating new jobs
- Identify where you can get further information, support and funding
- inspire regions to develop their own regional Sustainable Energy Action Plans and implement Sustainable Energy Projects at the regional level, as well as collaborate with and support their local municipalities

The aim is to **enable European regions to become frontrunners** in achieving such benefits by **inspiring them to replicate actions in their region**. This is based on experiences from the [12 ENNEREG Pioneer Sustainable Energy Regions](#), encompassing regional Sustainable Action Plans (SEAPs) and linked sustainable energy measures. By the time you reach the end of the Inspiration Guide you will know how to create your region’s Sustainable Energy Action Plan (SEAP) not only as a collection of measures, but also as a strategy that makes these measures coherent with European, National and Local regulations that you need to be familiar with. You will also have been introduced to numerous concrete examples of Sustainable Energy Projects that you could replicate and could help you.

The lead partners in each ENNEREG Pioneer Region range from **regional and local governments**, to **national and regional energy agencies** to **private companies**, illustrating how regional energy actors can **take the lead in helping you to become a Sustainable Energy Region**. In addition, several of the ENNEREG Pioneer Regions are [Covenant of Mayors Territorial Coordinators](#), while two regions include islands which have been developing **ISEAPs** as part of [ISLE-Pact](#).

The shortcut to the **Regions 202020 Inspiration Guide** is: <http://regions202020.eu/inspiration>

The Inspiration Guide has also been published on DVD-ROM (as illustrated below). The launch of the Inspiration Guide was publicised in e-Bulletin number 3 while the availability of the final version was promoted at the end of the project period in e-Bulletin 4 see: <http://www.regions202020.eu/cms/news/e-bulletin-3-en/> and <http://www.regions202020.eu/cms/news/e-bulletin-4-en/>

Database of Resources

Website users can search for resources in the Regions 202020 Database of resources at:
<http://regions202020.eu/inspiration/resources/>

A complete list of resources organised by ENNEREG Region can be found in Annex 1 of this report. Many of the resources included PDF files which are listed in Annex 3.

By the end of the ENNEREG project in April 2013:

- More than **640 resources** had been added to the website
- More than **12 000 Inspiration Guide and Resource pages** were viewed each month.
- Almost **10 000 PDF publications** were downloaded each month.

As can be seen from Figure 20 below, most resource pages added in the first 16 months that the website was online were viewed between 100 and 200 times during the second half of the project. However, the PDF files attached to these resources were viewed many more times which suggests that they were accessed directly via third party web pages and search engines.

The majority of PDF files on the website were viewed between 300-500 times during the period evaluated, although 2 were downloaded more than 10,000 times and a further 8 were viewed 1000-5000 times.

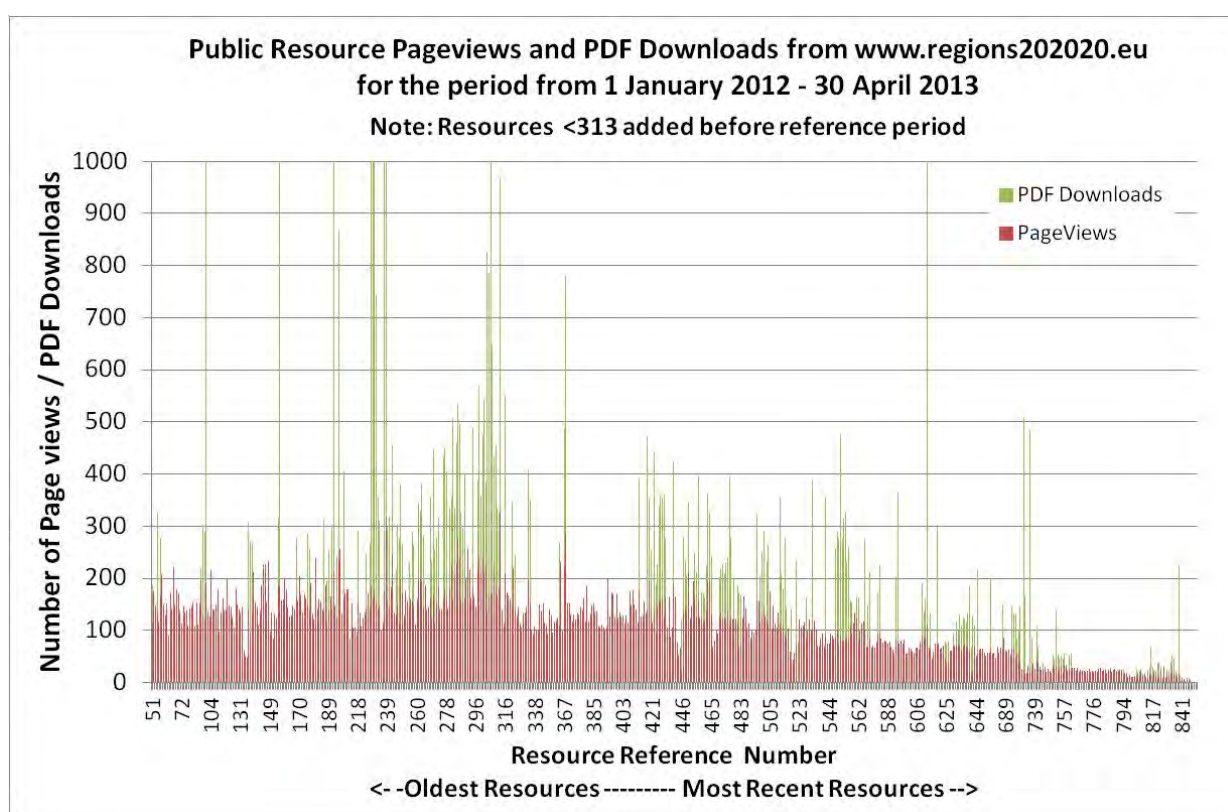

Figure 20 Page views and PDF downloads for public resources on the Regions 202020 website.

Table 1 below shows the number of times each of the most popular PDF files on the Regions 202020 website was downloaded and many times the related resource page was viewed during the last 16 month period of the ENNEREG project (1 January 2012-30 April 2013). As can be seen, presentations from the Energy Events in Kaunas in Lithuanian were particularly popular and were frequently viewed via direct links from a third-party website or search engine.

Two ENNEREG project reports were also disseminated at significant levels:

- Experience from the ENNEREG Regions [EN]: Development of ENNEREG Regional Sustainable Energy Action Plans - downloaded 1,819 times
- Publication [EN]: First phase of implementing sustainable energy projects (SEPs) in the ENNEREG regions - downloaded 641 times

A complete list of PDF resources available on the website and Inspiration Guide DVD-ROM can be found in Annex 3.

Table 1 The 20 Most popular PDF files disseminated via the Regions 202020 website during the last 6 months of the ENNEREG project

Presentation [EN]: Smart Grids Bidelek Sareak Project	163	624
Presentation [LT]: Biokuro gamyba iš žemės ūkio ir energetinių augalų atsinaujinančios energetikos plėtra (Event: 2011-09-29: 29 Sept 11, ENNEREG Seminar, Kaunas, Lithuania)	152	592
ENNEREG Good Practice Case Study [EN]: Birštonas - Ecotown, Kaunas, Lithuania - ENNEREG Good Practice in Energy Efficient Buildings and Renewables	288	493
Presentation [EN]: Introduction to the Advisory Board meeting of the ENNEREG project (Event: 2013-03-19: 19-Mar-13 ENNEREG Advisory Board Meeting)	24	484

As illustrated in Figure 21, the resources also included links to other websites and many of the PDFs and other resources were available in languages other than English (which was the main language for the website and ENNEREG project activities), with resources in Lithuanian being particularly popular.

As illustrated in Figure 22, and discussed above, various types of resource were added to the database, with presentations and other event resources being particularly popular.

The results presented in this evaluation report confirm that the Regions 202020 website has met the needs of the ENNEREG project by ensuring that project publications reach its target audience both at the regional and European level ensuring support for regional actions in the ENNEREG regions and inspiring replication in Sustainable Energy Regions throughout Europe.

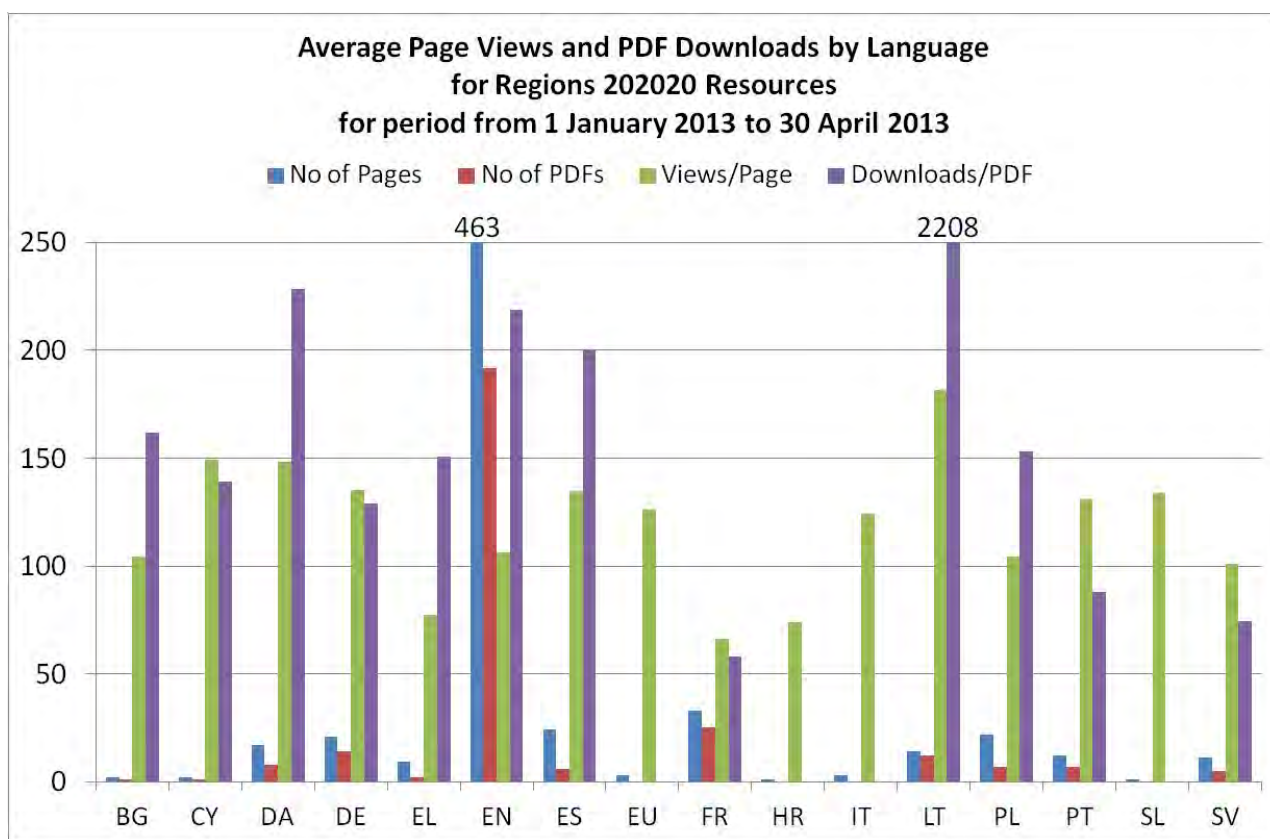

Figure 21 Average Page Views and PDF downloads by language for resources in the database on the Regions 202020 website during the last 16 months of the ENNEREG project.

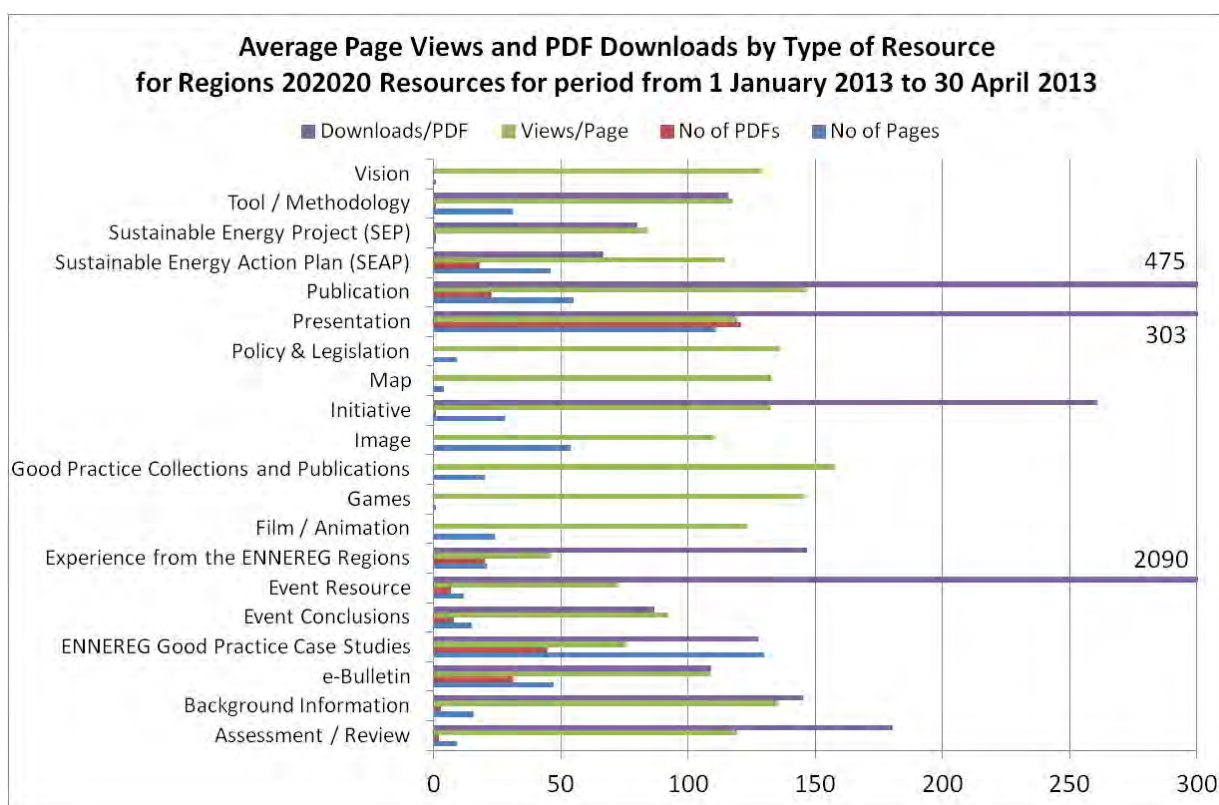

Figure 22 Average Page Views and PDF downloads by resource type for resources in the database on the Regions 202020 website during the last 16 months of the ENNEREG project.

Annex 3: Dissemination of PDF files via the Regions 202020 website

The table below shows the number of times each PDF file on the Regions 202020 website was downloaded and many times the related resource page was viewed during the last 16 month period of the ENNEREG project (1 January 2012-30 April 2013). As can be seen, presentations from the Energy Events in Kaunas in Lithuanian were particularly popular and were frequently viewed via direct links from a third-party website or search engine.

Description of PDF Resource	Number of times resource page was viewed	Number of times resource was downloaded
Event Resource [LT]: ENNEREG Seminaras, 29 September 2011, Kaunas - Metodine medžiaga - Žemės ūkis energetika (Event: 2011-09-29: 29 Sept 11, ENNEREG Seminar, Kaunas, Lithuania)	182	14,030
Presentation [EN]: Experience and Innovation in Smartgrids	169	11,537
Publication [LT]: Kaip taupyti energiją - 8 lankstinukai vaikams ir jų mokytojams (Event: 2011 -04-11: 11 & 14 April 2011 - Energy Day in Kaunas, Lithuania)	319	4,641
Presentation [LT]: Biokuro gamybos žemės ūkyje plėtra ir tvarumo aspektai – agronominis požiūris (Event: 2011-09-29: 29 Sept 11, ENNEREG Seminar, Kaunas, Lithuania)	176	2,492
Publication [LT]: Kas yra atsinaujinantys energijos ištekliai? (Event: 2011-04-11: 11 & 14 April 2011 - Energy Day in Kaunas, Lithuania)	175	1,999
Experience from the ENNEREG Regions [EN]: Development of ENNEREG Regional Sustainable Energy Action Plans	111	1,819
Presentation [EN]: Introduction to the ENNEREG Project	190	1,184
Presentation [EN]: Developing & Submitting Successful SEAPs – experience from Denmark and the IEE come2CoM project (Event: 2011-04-05: 5 April 2011 - Financing and Developing Sustainable Energy Action Plans)	185	1,098
Presentation [LT]: Darnios energetikos veiksmų planas Kauno Regionui (Event: 2011-07-07: 2011 m. liepos 7 d. - Kauno regiono savivaldybi)	214	1,029
Presentation [LT]: Žemės ūkio augalų biomasė bioenergetikai (Event: 2011-09-29: 29 Sept 11, ENNEREG Seminar, Kaunas, Lithuania)	162	945
Presentation [EN]: Smart Grids challenges vision R&D activities	135	691
Publication [EN]: First phase of implementing sustainable energy projects (SEPs) in the ENNEREG regions	327	641
